

## Anti-HA Tag Mouse Monoclonal Antibody

Date: 2013.06

Version: 13-01

Cat # : PT-LA-HA-MS      Size : 100 $\mu$ g (1 $\mu$ g/ $\mu$ L)

### Product Description:

Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins.

### Origin (Antigen):

This monoclonal antibody was raised by immunizing rabbit with the peptide of epitope "YPYDVPDYAC" conjugated to carrier protein.

### Application:

Western Blot analysis (WB): 1,000 ~ 9,000 dilution

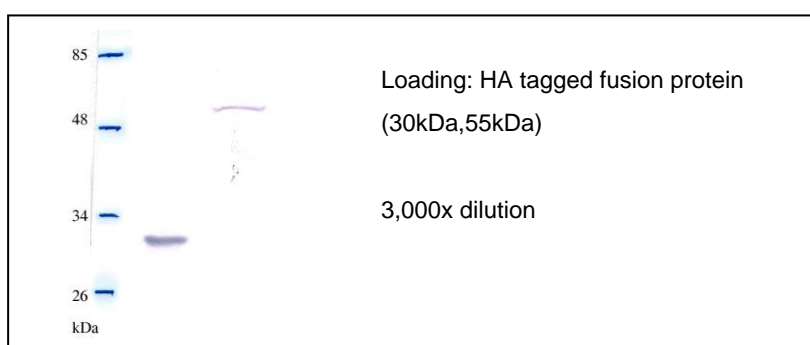

ELISA: 2,000 ~ 20,000 dilution

IP: 500 ~ 1,000 dilution

### Form & Storage:

Liquid form (containing 50% glycerol)

Store at -20°C. This product is stable for 1 year from the date of shipment.
